Profile

Information Technology student at SSN College of Engineering with strong proficiency in Python, web development, and machine learning. Experienced in building real-world projects involving UI/UX design, frontend development, and applied AI solutions. Skilled in modern technologies and frameworks, with a passion for creating impactful software and continuously expanding expertise in software development and artificial intelligence.

Education

SSN College of Engineering, B.Tech in Information Technology Aug 2023 – May 2027

- CGPA: 7.98/10

Bethlahem Matric Hr. Sec. School, HSC Jun 2022 – Apr 2023

- Percentage: 95.8

Experience

Research Intern, NIT Trichy – Trichy, India May 2025 – Jun 2025

- Built a deep learning model for face generation from pencil sketches using image-to-image translation.
- Evaluated models using metrics such as SSIM and PSNR; achieved an average SSIM of 0.86 and conducted extensive experiments to improve output quality and architectural efficiency.
- Co-authored a paper detailing the methodology and model comparison.

Design Intern, Maitilabs – Chennai, India

Aug 2024 – Dec 2024

- Designed the homepage and subpages for Maitilabs, enhancing overall user experience and interface.
- Maintained visual consistency across 10+ key sections, enhancing user retention and reducing bounce rate.

Skills

Managerial: Communication, Logical Thinking, Adaptability, Emotional Intelligence

Technical: Python, Java, Artificial Intelligence, SQL, HTML, Tailwind CSS, UI/UX, ReactJs, Flask

Tools: VS Code, Postman, PyCharm, Git, IntelliJ

Projects

Face Generation from Sketches

github.com/RahulJoshvaa/

- Designed a GAN-based model for sketch-to-face translation using Attention U-Net and perceptual loss to enhance spatial detail and visual realism.
- Achieved superior SSIM (avg. 0.86) and PSNR scores; co-authored a technical paper detailing the methodology and results.

Responsive Portfolio Website

github.com/RahulJoshvaa/

- Built a personal portfolio website using React and Tailwind CSS, with full mobile responsiveness and clean UI design.
- Deployed using GitHub Pages with CI/CD integration for automated builds and updates.

Garbage Bin Monitoring Network

[Ongoing]

- Designing a smart waste management system to monitor bin fill levels and optimize collection routes, aiming to reduce overflow incidents by 30%.
- Building a centralized network with real-time alerts and route optimization to improve operational efficiency and cut fuel usage by up to 25%.
